

POWER SUPPLY SCHEMATIC 2014 Issue

The *Power Supply Schematic* (PSS) – **last updated in late 2014** - provides a clear picture of the **physical structure** of the energy supply industry:

- 1) The NEM in the east and
- 2) The WEM in the west.

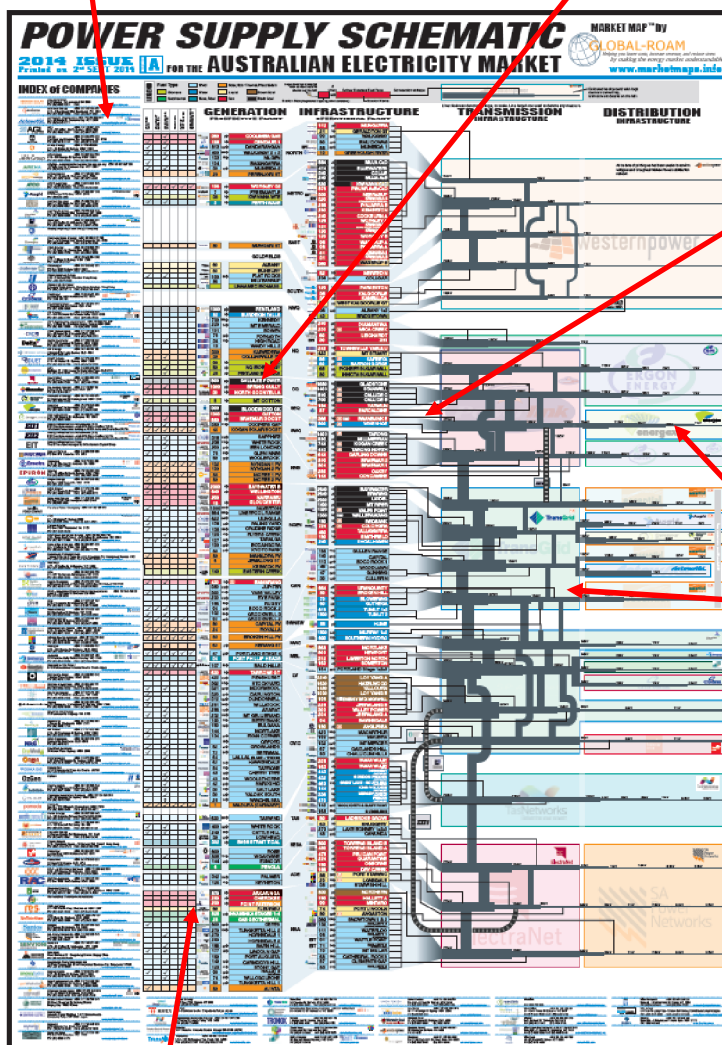

It includes a view of the various parties who own the **physical infrastructure** that makes up the supply chain. Assets that were “for sale” at the time are identified (some have been sold, some have not).

Contact details

- ✦ Contact details provided for the companies shown on the map in the generation, transmission and distribution sectors

Prospective Generators

- ✦ We've assembled a long list of prospective generation projects (about 500 projects)
- ✦ We're tracking their progress as they tick off milestones to “Committed” status
- ✦ We're selecting the best ones to show to highlight the diverse range under consideration.

Existing Generation Stations

- ✦ Major generators across the NEM and the SWIS identified by owner, fuel type, location, connection voltage and size

Transmission and distribution

- ✦ Networks shown connected across zones and regions
- ✦ Network and interconnection voltages shown.
- ✦ Owners of various network elements highlighted

Development Status

Status provided of development projects against key milestones (which you can update as developments progress)
